

FOR IMMEDIATE RELEASE:

Stonefield Software Inks Australian Distribution Deal with Sage

ORLANDO, FLORIDA, REGINA, SASKATCHEWAN, CANADA, CHATSWOOD NSW, AUSTRALIA – APRIL 21, 2009 – [Stonefield Software](#) has signed a distribution deal with [Sage Business Solutions](#) to expand the distribution of its popular database reporting software, [Stonefield Query](#), to the Australian, NZ and Pacific Island Market. The new agreement builds on its dramatic growth as the premier end user focused database reporting software solution in the U.S. and Canada, and expands into the Australian and New Zealand region with a prospective market share of tens of thousands of Sage Software users.

Stonefield Software believes that the sales generated from this distribution agreement will be significant to its total international revenues and represents its latest successful initiative to expand its international sales. Under the terms of the agreement, Sage Business Solutions will distribute certain Stonefield Query products throughout Australia, New Zealand, Fiji, Papua New Guinea, Solomon Island, Vanuatu and Tonga.

“We’re excited that companies outside of the North American market will now be able to realize the incredible time-saving and ease of use benefits of Stonefield Query with their existing Sage software, said Mickey Kupchyk, CEO of Stonefield Software. “Whether they’re in New York, Calgary or Adelaide, under-the-gun executives need information right now to make critical decisions. They can’t afford to wait on programmers to create specialized reports they need today.”

“Time is in ever-shorter supply, and it’s what [Stonefield Query](#) gives back to its busy users,” said Mike Lorge, Managing Director of Sage Business Solutions. “The popularity of Stonefield Query in the world’s largest market, North America, has made Stonefield a world leader in making database reporting tools that are focused on allowing business users to create reports as opposed to developers” he added. “We’re confident that Stonefield Query will be of huge interest to our clients since it makes reporting easier for Sage software clients. We are very pleased to represent Stonefield and have this innovative and customer-focused company as one of our Sage Software Development Partners.”

[Stonefield Query](#) serves a wide range of clients from small businesses to large corporations and government agencies such as NASA and the U.S. Defense Department. The software makes it possible for non-technical businesspeople to create wizard-driven specialized reports from most major accounting and database software. [Stonefield Query](#) is so intuitive that users with no technology or software programming skills can learn [Stonefield Query](#) in less than 30 minutes, and can create wizard-driven reports in 60 seconds or less — without IT support. Wizard-driven [Stonefield Query](#) enables business executives, sales managers and administrative assistants who need customized business reporting – once the domain of the IT help desk or expensive outside consultants – to now create their own reports, right from their desktops.

[Stonefield Query](#) will be made available through an Australasian-wide network of certified software resellers found below by clicking the links below for the following accounting and CRM packages:

- [ACT! by Sage](#)
- [Sage Accpac ERP](#)
- [Sage Pro ERP](#)
- [Sage SalesLogix](#)
- [Sage Timberline](#)
